ABOUT US

FOR PEOPLE WHO WANT QUALITY

WELCOME TO SARINA FLOORING

Since 1981, as a pioneer company, Sarina Flooring has adopted a "customer-oriented business policy" with a strategy to provide its customers best floor covering products at the most competitive price. At Sarina Flooring, we strive to achieve customer satisfaction by providing flooring options that are most in demand and compatible with modern building and interior decoration techniques.

Sarina Flooring builds its product range in such a unique way that we consult renowned architects, interior decorators, and builders for their valuable inputs and collective market analysis; thereafter, we ensure the product's enhanced features and aesthetics, along with its market outreach. On the other side, our business research and development team ensures that the products are acquired from well-known manufacturers all over the world.

That is why Sarina Flooring proudly claims that whatever types of flooring you need, we are available to provide you with better quality solutions and guarantee the best alternative for the amount you have spent. Moreover, the time-to-time research that our team conducts on a regular basis helps to introduce new decor, product lines, and enhanced features. The Professional Labour and Floor Installation team is another strength of Sarina Flooring on which we claim that **FLOOR CORVINGS ONLY WORKS WHEN IT IS INSTALLED PROPERLY.**

Our Mission

Our goal is to bring in the most premium products to our Customers and to become the best supplier of our products line in the terms of quality, customers satisfaction, after sale Services.

Our Vision

To be recognized as the name of premium quality products.

Solid wood Floor

Solid wood flooring is a popular type of hardwood flooring made from one piece of hardwood timber such as American Okan Wood or Walnut Wood. This is also referred to as real wood flooring and available in various impressive Stains. In Modern Building Structures this wood flooring is very much popular and is recommended for domestic and commercial application, as it enhances the floor looks and appeal.

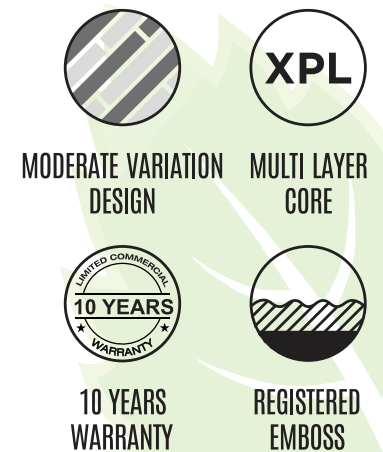

Laminate Wood Floors

Laminate Wood Floor

Laminate Flooring is an innovative and price competitive flooring solution that is made up of a multi-layer synthetic flooring product bonded together with a lamination process. Laminate flooring simulates wood with a photographic applique layer under a clear protective layer (HDF Core Board, Overlay, Decorative Paper and Backer). Our product is of a superior water-resistant quality with minimum 10 years manufacturer warranty.

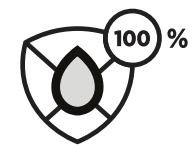

Sports Flooring

Sports Flooring is specially designed and Engineered product suitable for multipurpose sport playground fields i.e. Tennis court, Squash Courts, Volley Ball Courts, Jogging tracks, Gymnasiums, and multipurpose facilities and available for both indoor and outdoor Sports.

EPDM
Flooring

EPDM Flooring

Development of Multipurpose Sports Facilities is never such an easy task, But with EPDM Flooring you can develop and revitalise your Sports Fields in very efficient manner. The EPDM flooring that is also termed as Rubber Granular Sports Flooring has the enhanced features i.e., UV Resistance, Bright Colors, All time Weather Application, Soft, Safe, Durable and Antibacterial. At Sarina Flooring you can find the best quality imported EPDM Flooring at affordable price. This flooring is suitable for Tennis Courts, Volley Ball Courts, Jogging Tracks, and multipurpose facilities.

Artificial Grass

Artificial Grass or Artificial Turf is a surface of synthetic fibers made to look like a natural grass. It is most oftenly used (as an indoor and outdoor application) in the arenas for sports that are normally played on the grassy fields i.e., Foot ball Field, Hockey Turf. However, Now a days it is also being used as residential lawns and recommended for all indoor and out door applications within commercial and business premises.

Raised **Floors**

Raised Floor

Raised Flooring/ Elevated flooring system is also termed as Access Floor System. This flooring system is designed to raise the existing reinforced concrete floor High at a required position, with the help of the aluminum or a steel caged structure made of several panels placed on that. The Raised Flooring Served the purpose of creating a space below the visible floor to provide uninterrupted space for wiring, cables and electric supply cables. Raised flooring is most suitable for Computer room, Grid station and other information technology spaces, General open office areas, Training and conference areas, Exhibit spaces, Support spaces for offices, including electrical closets, fan rooms, etc

Our Raised Floor System is approved from NED University of Engineering and Technology - Earthquake Engineering Department (Advance Meterial Testing Lab) has approved our product quality.

SPC
Flooring

SPC Flooring

With the addition of SPC (Stone Plastic Composite) Flooring, Sarina Flooring product range and the business market is revived. Our customers are happy with this product, as this is the latest innovative material and a premium type of LVT (Luxury Vinyl Tile) that is 100% waterproof and a much more stable material than traditional LVT. SPC Floor is a multi-layered floor plank, that is created from a Stone Powder and PVC Plastic Combination that produces an incredibly durable dent-resistant material that doesn't expand and contract with environmental changes.
